

Show Off Your Coins with the PCGS Digital Coin Album

An Amazing Tool for Collectors from the PCGS Set Registry

Remember when you collected coins as a kid and searched through pocket change or traded with others to fill holes in your cardboard album? It was fun and made it easy to look at your coins. Now you can do it online through the PCGS Set Registry. You can create an elegant coin album which you can enjoy or share with your friends!

1

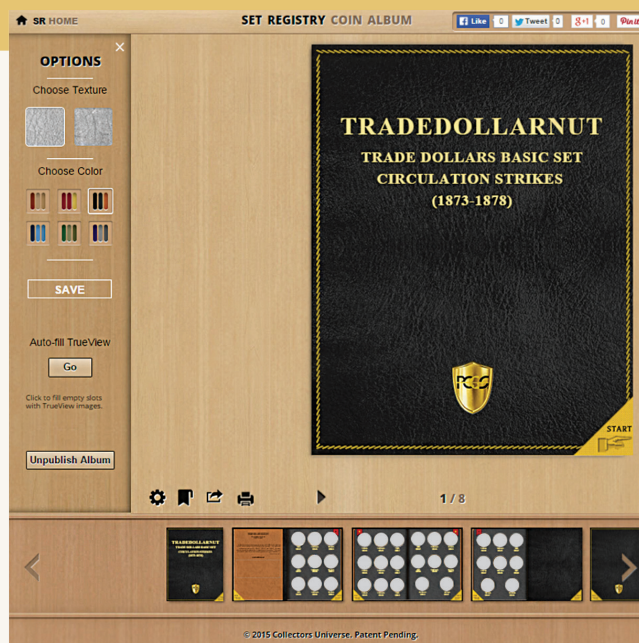

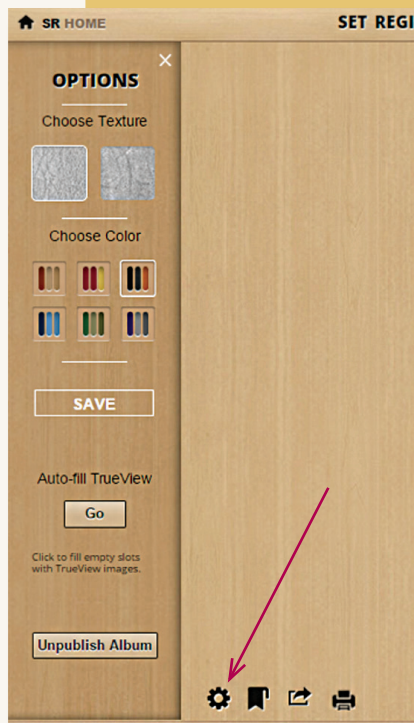

Simply log into **My Set Registry**, visit one of your sets, and build the album with the images added to your set.

Create Your Digital Album

2

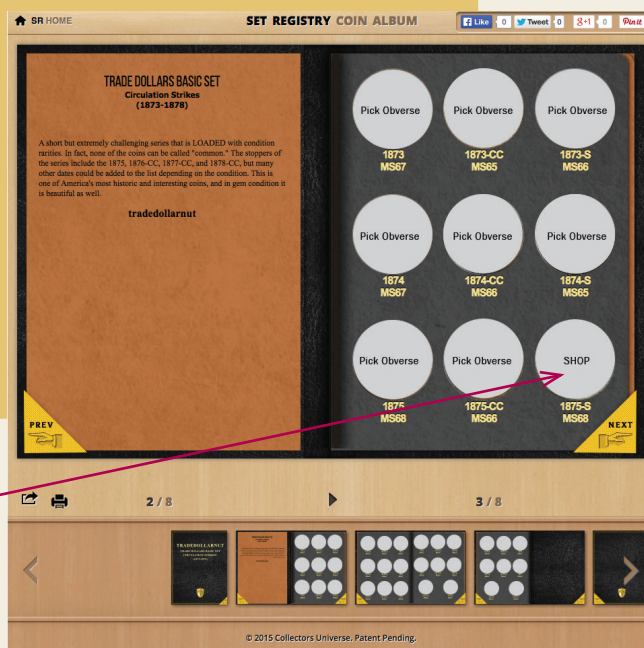

Once you have clicked **Create Digital Album**, your album is displayed. The cover shows the name of your set and the composite name. By clicking the **tool icon** you can choose from one of six different color palettes and two cover textures. If you have PCGS Trueview images of your coins, you can use the **Auto-fill function** to add all images at one time.

3

If PCGS experts have written about the set, it will display on the inside cover. You can also add your own personal set description.

The software recognizes which coins you have in your set and which have images. If you are missing an image, only your coin's grade will display. And, if you are missing a coin, you can use PCGS's Shop feature right from your album to search the Internet to find what you need.

4

Filling in the images is a matter of clicking the link in each hole, selecting the obverse or reverse image, and sizing it to fit the hole or using the Trueview Auto-fill function.

5

You can also bookmark pages for easy reference and create a PDF to print your album. Plus small thumbnails at the bottom of the page offer a quick way to view the pages. Click the **autoplay arrow** and a slideshow is presented. If you want to share your album with others, click the **share icon** and select your favorite social media program.

Create Your Digital Album

Once you have published the album, it is linked from the set in the Registry and you, or others admiring your set, can print or share it with other collectors.
